SUMMARY

Microsoft Certified Solution Architect with 18+ years of experience designing and delivering enterprise-scale solutions across Microsoft 365, SharePoint, Power Platform, and Azure ecosystems. Proven expertise in defining solution architectures, governance models, integration strategies, and migration roadmaps for complex, high-volume environments.

Strong track record of leading end-to-end architecture and delivery of large SharePoint and Microsoft 365 platforms, including on-prem to cloud and hybrid migrations, custom SPFx solutions, and automation using Power Platform and Copilot Studio. Experienced in translating business requirements into secure, scalable, and performant technical designs, while mentoring teams, driving best practices, and ensuring enterprise compliance, reliability, and long-term maintainability.

CORE SKILLS & EXPERTISE

- **Microsoft 365 & Dynamics 365**
  Enterprise platform expertise including collaboration, productivity, and business application solutions
- **SharePoint Online**
  Site architecture, information architecture, governance, security, content management, automation, and custom enterprise solutions
- **SharePoint Framework (SPFx)**
  Design and development of React-based web parts, extensions, and integrations using modern APIs
- **Microsoft Copilot Studio**
  Design and implementation of enterprise copilots, agent workflows, business process automation, and system integrations
- **Power Platform**
  Power Apps (Canvas and Model-Driven), Power Automate (Cloud flows), Power BI, Dataverse, AI Builder, and Microsoft Copilot–enabled solutions
- **Application Development**
  SPFx, REST APIs, Azure Functions, JSON-based configurations, and cloud-native integration patterns
- **Automation & AI Enablement**
  Workflow automation, Copilot integrations, and AI-assisted business process optimization
- **Architecture & Governance**
  Enterprise solution architecture, security and compliance models, governance frameworks, scalability, and performance optimization
- **Microsoft Azure**
  Azure Functions, Logic Apps, Foundry, agent-based solutions, and cloud integration services

CERTIFICATIONS

- PL-600: Microsoft Power Platform Solution Architect
- PL-400: Microsoft Power Platform Developer Associate
- PL-200: Microsoft Power Platform Functional Consultant
- MB-230 - Microsoft Dynamics 365 Customer Service Functional Consultant

- PL-900: Microsoft Power Platform Fundamentals
- Microsoft Applied Skills: Create agents in Microsoft Copilot Studio
- AZ-900: Microsoft Azure Fundamentals
- 070-488: Developing Microsoft SharePoint Server 2013 Core Solutions
- 070-573: Microsoft SharePoint 2010, Application Development

- 070-668: Microsoft SharePoint 2010, Configuring
- 070-542: Microsoft Office SharePoint Server 2007, Application Development
- 070-630: Microsoft Office SharePoint Server 2007, Configuring
- 070-528: Microsoft .NET Framework 2.0 - Web-Based Client Development
- 070-531: Microsoft .NET Framework 2.0 – Application Framework

AWARDS

- Insta Awards for 2022, Infosys Limited.
- Cloud on the Spot Award for 2013, Q1 –Q2, Infosys Limited.
- Best Performance Award in Quarter, 1st Quarter 2009, Atidan Technologies Pvt. Ltd.
- Best Performance Award in Quarter, 4th Quarter 2009, Atidan Technologies Pvt. Ltd.
- Best Performance Award in Quarter, 4th Quarter 2010, Atidan Technologies Pvt. Ltd

EDUCATION

Master of Computer Applications (2006), Jalgaon, India

B.Sc. Computer Science (2003), Shirpur, India

PROJECT DETAILS

BHOS Migration and Redevelopment **May 2023 To till Date**
Capgemini, Houston **Delivery Architect**

Description:

BHOS and DMS applications were custom SharePoint 2010 application which we migrated in SharePoint online, we have developed various Power App's, Power flows and Power BI reports and Copilot Agents using Microsoft Copilot Agent.

Following are the key responsibilities

- Architected and delivered 10+ secure, scalable Power Platform and RPA solutions, reducing manual effort by 40% and improving process cycle time by 35% across CRM, and analytics systems.
- Developed AI-powered agents using Copilot Studio, AI Builder, and LLM-based prompt engineering, enabling intelligent automation and multi-agent workflows that increased operational efficiency by 30%.
- Built and optimized 20+ Canvas and Model-Driven Apps leveraging Dataverse, SharePoint, SQL, and Excel, including an expense automation solution that reduced manual data entry by 20% and improved data accuracy.
- Engineered end-to-end integrations between cloud and on-prem systems using Azure Logic Apps, Power Automate, HTTP/custom connectors, and APIs, improving interoperability and system reliability by 25%.
- Led full SDLC delivery, mentored 10+ developers, managed project KPIs, budgets, and roadmaps, and supported M365 services (SharePoint Online, OneDrive, Teams), ensuring 99.9% service availability and audit-compliant deployments
- Designed and developed SPFx Webparts and Extensions
- Technical design Document, Functional Desing Document Preparation

Environment: SharePoint 2010, Microsoft 365, Dynamic 365, Power Platform, Sharegate tool

BH SHAREPOINT CONTENT SUPPORT **Jan 2022 To May 2023**
Infosys Limited, Houston **Technical Project Manager**

Description:

BH SharePoint Content Support project involves requirement elaboration, design, build, testing, implementation and support. The system will be developed and supported by SharePoint Designer, InfoPath, Power App, Power Automate.

Following are the key responsibilities

- Daily call with Offshore team to discuss the issues, new changes or CR's
- Weekly call with client manager
- Need to help Offshore team to fix the critical issues
- Provide the technical solutions wherever required
- Provide the estimation for small enhancement and even for new projects
- Need to work on high- and low-level design documents
- Daily interaction with client manager at onsite
- Daily calls with end users to fix their issues at CST time zone
- Providing additional functionalities in SharePoint 2010 and Office 365, Power App and Flows using:
    - Planning and designing the Power App forms, flows
    - **SharePoint Framework (SPFx)** Apps, **CEWP** referenced to scripts developed using JavaScript Object Model Client (**JSOM**), SharePoint **REST API** and **jQuery.**
    - Creating **PowerApps** forms
    - Creating and modifying **web parts** and **event receivers** with full trust solutions of OnPrem.
    - Developing and customizing sites with rich user interface using **CSS, jQuery**
    - Developing workflows using **Power Automate** (**Flow)**
- Administration and issue fixes using **PowerShell Scripts.**
- SP 2010 sites Migrations to SP Online using Sharegate Tool

Environment: SharePoint 2010, Microsoft Office 365, Power Platform, InfoPath Windows Server 2012

FABP Migration **Mar 2020 To Dec 2021**
Infosys Limited, Denver **Team Lead**

Description:

Firm Accounts Balances and Positions (FABP) application is mainly design and developed in SharePoint 2010, .Net 3.5, SSIS and SSRS. It has 6 Custom solutions, 2 for SSRS reports, 2 for SSIS Packages and 2 for Custom Timer Jobs and Custom Application pages. There are 2 main web sites, FABP and FABP Global, which I am migrating from SharePoint 2010 to SharePoint 2019

Following are the key responsibilities

- Planning and designing the SP 2019 Farm Architect
- Migration Planning and documentation
- Installation of required Software's/components on new SP 2019 environments, like VS 2019, SQL 2019, SharePoint 2019 and so on.
- Performing actual migration from SP 2010 to SP 2019
- Deployment of Custom Solutions in a new environment
- Creation of new certificates using Venafi
- Migration bug fixing and Unit testing

Environment: SharePoint 2010/2019, Windows Server 2012 and 2019, Net3.5 and 4.6, PowerShell, SQL Server 2012 and 2019, Visual Studio 2019

CSH Support & Development **Mar 2017 To Feb 2020**
Infosys Limited, Denver **Team Lead**

Description:

This is an end-to-end application development and support project involving requirement elaboration, design, build, testing, implementation and support. The system will be developed and supported by SharePoint Designer.

Kraft Heinz project involves development and support for more than thousand existing SharePoint sites. These sites are developed mainly to represent Kraft foods company brands, sub brands, various products, services, Recipes. For each brand, sub brand, product, services and recipes they have separate sites and document libraries to maintain all the required documents. They have various dashboards in few sites to display their product details and various other new features

My Responsibilities:

- Daily call with Offshore team to discuss the issues, new changes or CR's
- Need to help Offshore team to fix the critical issues
- Provide the technical solutions wherever required
- Provide the estimation for small enhancement and even for new projects
- Need to work on high- and low-level design document
- Daily interaction with client manager at onsite
- Daily calls with end users to fix their issues at CST time zone
- Providing additional functionalities in SharePoint 2010 and Office 365 using:
    - **SharePoint Framework (SPFx)** Apps, **CEWP** referenced to scripts developed using JavaScript Object Model Client (**JSOM**), SharePoint **REST API** and **jQuery.**
    - Creating **PowerApps** forms
    - Creating and modifying **web parts** and **event receivers** with full trust solutions of OnPrem.
    - Developing and customizing sites with rich user interface using **CSS, jQuery**
    - Developing workflows using **Power Automate** (**Flow)**
    - Creating **PnP PowerShell script** to synchronize network folder content with O365 library.
- Administration and issue fixes using **PowerShell Scripts.**

Environment: Microsoft Office 365, SharePoint 2013/2010, MOSS 2007, Windows Server 2008 R2 Standard, C#, PowerShell, SQL Server 2012, Visual Studio 2013

Kraft Heinz Support & Development **Jul 2015 To Feb 2017**
Infosys Limited, Chicago **Team Lead**

Description:

The project that provides Operations Support and Shared Services for Charles Schwab Corporate Information Technology (CIT). CIT consist of various domains like Corporate System, Digital workspace (Intranet Platform), Sales, Services, Voice solutions and Business Process management.

Involves Incident Management, Problem Management, Automation using PowerShell script , Selenium, Preventive Maintenance, Health check monitoring and Deployment and production checkouts.

Following are the key responsibilities

- Resolve reported incidents associated with Intranet platform
- Intranet site administration
    - Problem management working with Dev team
    - Identify automation tools and automate daily health check
    - Resolve issues with custom code deployed to SharePoint on premise environment, also resolving issues with Intranet sites portals.
- Help with resolving issues after SharePoint 2013 sites upgrade if any
- Daily communication with users to understand their issues/requirement
- Daily call with Offshore team to explain and fix the critical issues

Environment: SharePoint 2013/2010, Windows Server 2008 R2 Standard, C#, PowerShell, SQL Server 2012, Visual Studio 2013

UL Content Migration	**Dec 2014 To Jun 2015**
Infosys Limited, Pune	**Team Lead**

Description:

We are developing five custom utilities to migrate data from UL 1.0 to UL 2.0 SharePoint 2013 Portal. UL 1.0 site is a SharePoint 2013 site which is having below Master lists with large amount of data

- Products list is having 40,000 records
- Organizations list is having 20,000 records
- Product list is having 80,000 records

UL 2.0 SharePoint 2013 portal is well organized SharePoint portal where each product and organization is having separate site collections and for each product test site there is a sub site in Product site collection.The purpose of five utilities is migration of all data from UL 1.0 to UL 2.0 with proper relationships and structure

My Responsibilities:

- Lead Migration Team technically
- Gathering requirements from client. Communicate with client on status reports.
- PoC on Migration
- Estimate and Plan Migration Strategy and project deliverables

Environment: SharePoint 2013, Windows Server 2008 R2 Standard, C#, PowerShell, SQL Server 2012, Visual Studio 2012

BH-EA Work Space	**Mar 2013 To Nov 2014**
Infosys Limited	**Team Lead**

Description:

Baker-Huge workspace is used by Enterprise Architect. We have developed this site for Enterprise Architecture, where they can review various systems. They can create new engagements for each system to review and to do assessments as per their requirements for each system. There are various categories of assessments for each system. Enterprise Architect could be able to add findings against each assessment and system. Also, they could able to add various documents for each system.

We have developed various reports as per requirement e.g Overdue Findings, SDSF Score, ASF Score, Tier report by engagement, Tier Report by System, also developed SSIS Package to fetch data from external data sources.

Environment: SharePoint 2010 and SharePoint Designer 2010, JQuery, ECMA Scripts, c#.Net, SQL Server Integrated Services, JavaScript, HTML, CSS

My Responsibilities:

- Gathering requirements from onsite coordinator. Communicate with client on status onsite coordinator.
- Technically leading team.
- Development
- Unit testing, fixing bugs reported in application testing
- Deploying the solution in UAT and production environment

Kraft Foods Portal	**Jan 2012 To Feb 2013**
Infosys Limited	**Team Lead**

Description:

This is a very huge SharePoint 2010 portal developed for **Mondelez**, which has around 700 site collections and 3000+ sub sites. We used to develop new site collections with new UI/Designs and navigation with various other new features. One site used to take around 3 to 4 weeks' time to develop. Below are the common features which clients ask us to develop

- Approve workflow using Nintex
- InfoPath forms
- Generic top navigations

- Rotator web parts, OOTB web parts, filter web parts

My Responsibilities:

- Lead Migration Team technically
- Gathering requirements from client. Communicate with client on status reports.
- Estimate and Plan Migration Strategy and project deliverables
- Dividing the project into Modules and explaining/assigning to the Team members.
- Code review and unit testing

Environment: SharePoint 2010, SharePoint Designer 2010 Windows Server 2008, JavaScript, HTML, CSS

Sales Source Support and Enhancement **Jul 2011 To Dec 2011**
Atidan Technologies **Team Lead**

Description:

Spotlight Sale Source is a comprehensive intranet portal used by the Comcast Spotlight Sales Source department. Spotlight Department is divided into hierarchy: Division and Market and department. Each division is divided into multiple Markets. The content has been distributed among all the three level.

New Custom enhancements

- Document Notification Process (Custom Timer Job)
- Folder deletion Process (Custom Timer Job)
- Ads Banners (Custom web part)
- ISpot (Custom web part)
- Add Network (Custom feature)
- Double Mapping functionality (Custom web part)

SharePoint Customization: Custom web parts, Custom Timer Jobs, Event Receivers

My Responsibilities:

- Gathering requirements from client. Communicate with client on status reports.
- Technically leading team.
- Designing the solution.
- Developing the custom web parts, features and timer jobs, permission management
- Fixing testing issue
- Deploying the solution in UAT and production environment

Environment: Microsoft Office SharePoint Server **(MOSS)** 2007, SharePoint 2007 designer, Windows Server 2003, C#, ADO.NET, SQL Server 2008

Spotlight Sales Source Migration **Jan 2011 To Jun 2011**
Atidan Technologies **Team Lead**

Description:

Migration of each web application available in Comcast Production environment

My Responsibilities:

- PoC on Migration
- Estimate and Plan Migration Strategy
- Communicate with client on status reports.
- Architecture Design

Environment: Microsoft Office SharePoint Server **(MOSS)** 2007, Windows Server 2003, SQL Server 2008, 2005

Spotlight Sales Source **May 2010 To Dec 2010**
Atidan Technologies **Sr. Developer**

Description:

Spotlight Sale Source is a comprehensive intranet portal used by the Comcast Spotlight Sales Source department. Spotlight Department is divided into hierarchy- Corporate, Division and Market. Each division is divided into multiple Markets. The content has been distributed among all three level.

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues
- Involvement in client calls

Environment: Microsoft Office SharePoint Server **(MOSS)** 2007, Windows Server 2003, SQL Server 2005, ASP.Net 2.0, C#, SharePoint Object Model, Java Script, SharePoint Designer 2007

Levy **Jun 2009 To Apr 2010**
Atidan Technologies **Sr. Developer**

Description:

Levy presently uses the Advisors Assistant (AA) to manage its client related information. This system is based on the earlier generation of technology. Levy would like to replace the AA system with a modern database application that can readily integrate with modern collaboration platform like SharePoint.

Key requirements are:

- Replacement of AA system
- Collaboration Portal for Product and Service offerings of Levy
- Easy and fast search of the enterprise information

SharePoint Customization: custom web parts

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues
- Involvement in client calls

Environment: Microsoft SharePoint Portal Server (MOSS) 2007, ASP.Net 2.0, C#, SharePoint Object Model, Java Script, SharePoint Designer 2007

PE Console ETL Tool **Jan 2009 To May 2009**
Atidan Technologies **Sr. Developer**

Description:

This tool mainly created to fetch data from Oracle database to Sql server database. This was done by using Custom Window service which runs in the background as per the schedule to check for the relevant schedule date. It checks all type of validations

- Error Logs is maintained to capture with the details of the Errors / Exceptions.
- History of previous set of data has maintained.
- Generate reports
- Email Notification

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues

Environment: ASP.Net 2.0, C#, SQL Server 2005

Gift-Txt **Mar 2008 To Dec 2008**
Atidan Technologies **Developer**

Description:

Gift-Txt is an innovative marketing and service platform that is convergence of mobile commerce and gift card/loyalty technology, forming the basis for a new marketplace. It offer a unique solution empowering the retail/hospitality customer with a virtual gift card platform that uses mobile phones as the "card" and the mobile network as the prime communication

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues

Environment: ASP.Net 2.0, C#, SQL Server 2005, Java script

Legal Policy Database **Jul 2007 To Feb 2008**
Atidan Technologies **Developer**

Description:

Developed web based SharePoint application for Comcast- Legal department. This portal is for creating, maintaining and distributing policies (documents) to employees. Policy is categorized into individual and company welfares. The purpose of this application is to provide seamless integration of client, policy and organization information with collaboration and search facilities of MOSS.

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues

Environment: Microsoft SharePoint Portal Server (MOSS) 2007, ASP.Net 2.0, C#, SharePoint Object Model, Java Script, SharePoint Designer 2007, AJAX

Sweet Palmetto Home **Jan 2007 To Jun 2007**
Ripple Soft **Developer**

Description:

Developed Web based application for Saanya Soft. Buy, Sell or Lease Residential, Industrial or Commercial Property in South Carolina. This application is about, automated updating of Brokers/Agents data from MLS, Showing properties of individuals, sending automatic Email campaign for advertising, Search facility, Event manager and many more features.

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues

Environment: ASP.NET 2.0 (C#), SQL Server 2005, JavaScript, Ajax

Wedding Planner **Jun 2006 To Dec 2006**
Ripple Soft **Developer**

Description:

This is a web based application for Marriage planners. This application is about to create and maintain Address book (Guest List), Events, Reminders, Money Manager, Gift Manager, Seating Management, Notes

My Responsibilities:

- Development and Unit Testing
- Investigating & Resolving issues

Environment: ASP.Net 2.0 (C#), SQL Server 2005, Java script, html, CSS
